

Spybot Anti-Beacon is een op zichzelf staande tool die is ontworpen om de verschillende tracking (telemetrie) problemen in Windows 10 te blokkeren en te stoppen. Het is sindsdien aangepast om vergelijkbare volgfunctionaliteit in Windows 7, Windows 8, Windows 8.1 en Windows 10 besturingssystemen te blokkeren.

Spybot Anti-Beacon is a standalone tool which was designed to block and stop the various tracking (telemetry) issues present in **Windows 10**. It has since been modified to block similar tracking functionality in **Windows 7**, **Windows 8** and **Windows 8.1** operating systems.

Anti-Beacon is small, simple to use, and is provided free of charge. It was created to address the privacy concerns of users of Windows 10 who do not wish to have information about their PC usage sent to Microsoft. Simply clicking "Immunize" on the main screen of Anti-Beacon will immediately disable any known tracking features included by Microsoft in the operating system.

If any issues occur with your PC while using Anti-Beacon, undoing the changes made can be done by clicking the "Undo" button in the main window. This will re-enable all tracking services. If you experience any issues using Anti-Beacon or have any suggestions/recommendations, please be sure to let us know in the [forum thread relating to this tool](#).

Windows 7 Screenshots

Download

Spybot Anti-Beacon comes in two editions; as a standard installation or as a Portable Edition compatible with [PortableApps](#).

[Download v1.6 \(installer\)](#)

[Download \(Portable Edition\)](#)

[Safer-Networking Download Section](#)

SpybotAntiBeacon-1.6-setup.exe openen

U hebt gekozen om het volgende bestand te openen:

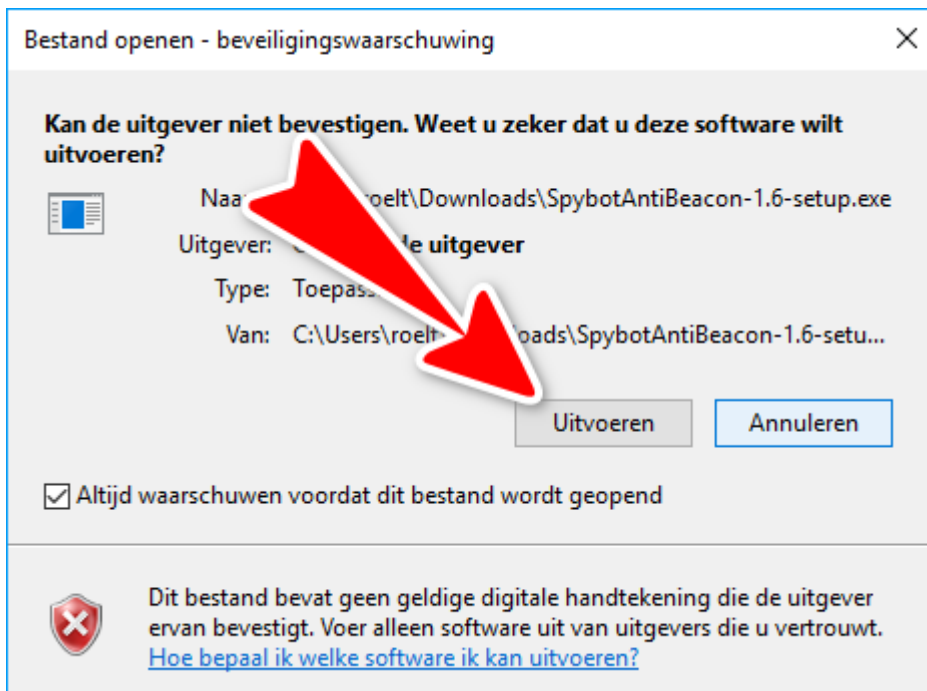

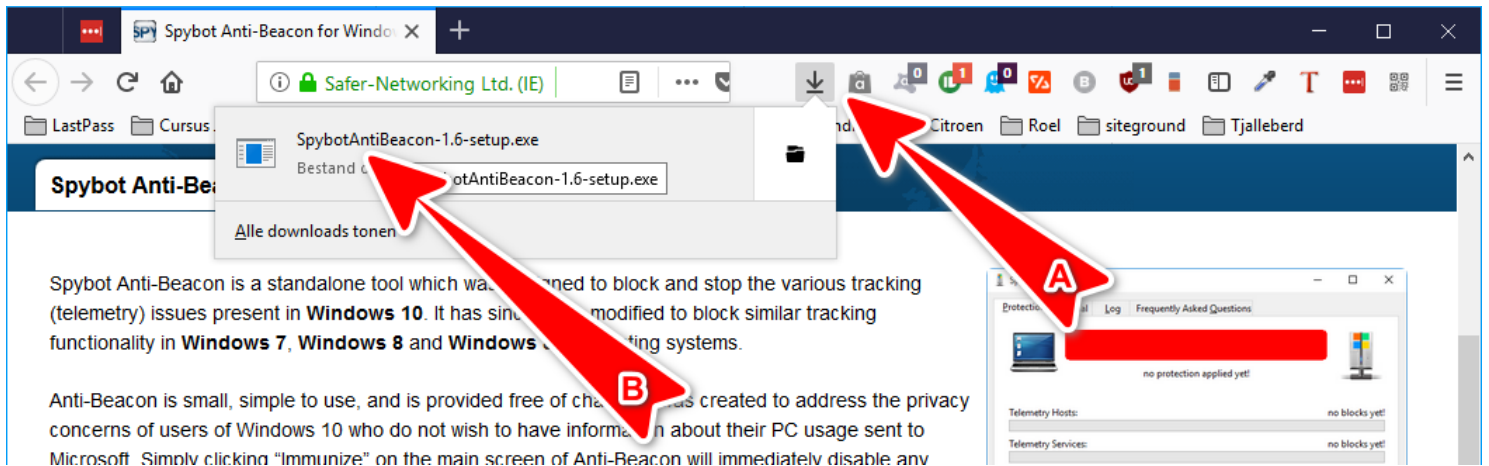

SpybotAntiBeacon-1.6-setup.exe

Dit is: Binary File (2,0 MB)

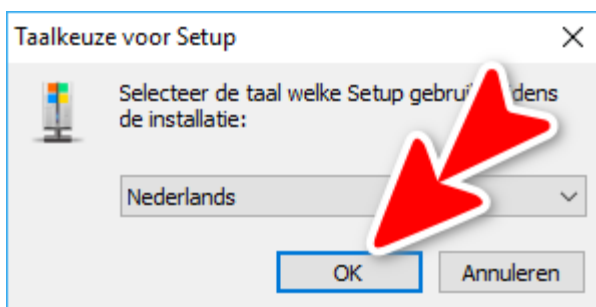

van: <https://download.spybot-anti-beacon.org/>

Klik op **JA** om verder te gaan

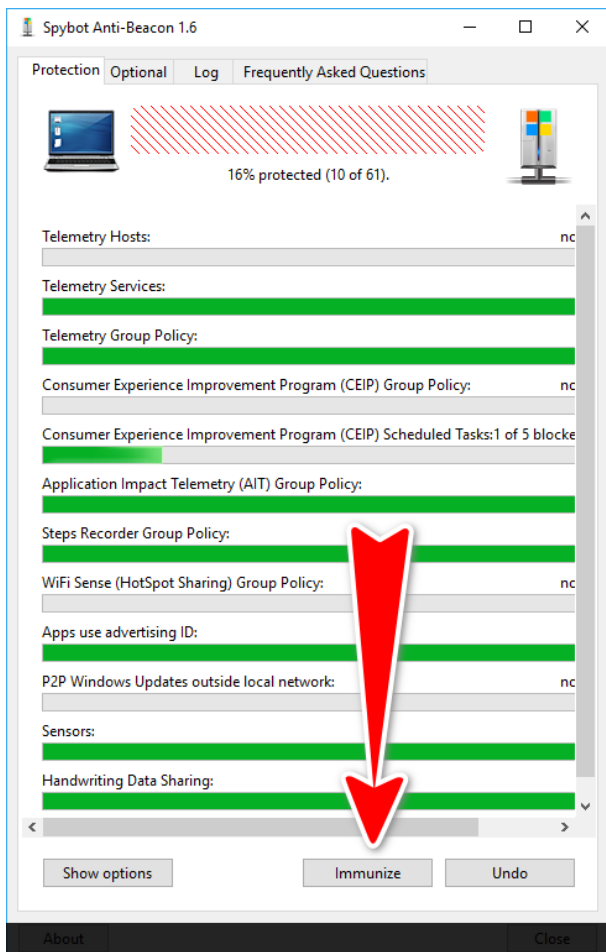

Klik op **JA** om verder te gaan

na installatie van versie 1.6 het programma openen en rechts onderaan op 'Immunize' klikken.

Klik vervolgens in de tabbar bovenaan op de tab 'Optional' . Ook daar heb ik alles geblocked (Apply buttons).
